Performance Handpieces & Small Equipment

Maxima[®] Advanced 3000 LED Curing Light

Highlights

- **High-Intensity Light:** Accelerates curing, reducing procedure times and minimizing the risk of retreatment
- **Dual-Wavelength Technology:** (380–500nm) Ensures thorough curing of various composite materials
- **Depth of Cure:** Reach depths of up to 3mm for reliable polymerization in a variety of applications
- **Continuous Operation:** Replaceable battery cartridges minimize downtime and keeps your practice running
- **User-Friendly Control:** Intuitive navigational keys offer easy access to four standard curing modes, including a gradual ramp-up option to promote successful curing

 **2 YEAR WARRANTY INCLUDED**
